

Hello Dr. Schwartzbauer,

Please consider this email as my notice and desire to be considered for election as FCLB District 4 Director. CV attached.

I believe my broad experience in the profession across academia, research, clinical care (both in private practice and multiple multidisciplinary work environments), regulation and accreditation would serve FCLB well. More directly, I currently serve as chair of the CA BCE and have served multiple years in that position and on every committee at BCE. Under my terms as chair at BCE we have voted to incorporate 'engagement' as part of our Mission statement. As I believe collaboration and involvement across the profession is crucial to the success of not only the profession but also all the professionals within it. Engagement is not just a word included in our Mission statement, it is something we strive to achieve via making ourselves available to the public, our licensees and the broader profession. This includes participation whenever feasible within leadership organizations locally and nationally.

Within my core career pathway, the VA, I have served on national leadership committees such as the Field Advisory Committee, Professional Standards Board (now a subject matter expert for this) and have presented to the national VA DC group on numerous occasions. I have also volunteered with FCLB and NBCE to include test development and proctoring Part IV, along with many other professional and leadership opportunities. Most recently, was asked to present the keynote at ACA's Student Leadership Conference at Northwestern Health Sciences University. I have had leadership training and consider communication one of my personal special interests and thus I am constantly seeking learning and further education there.

Thank you for your consideration.

Dave
