

## BOGHOSIAN VISIONARY AWARD

Dr. Karlos Boghosian has been called many, many things.

One of the truest of those is “Visionary.”

Few know that as well as those of us who served under his leadership.

As you may know, during Dr. Boghosian’s presidency, the FCLB expanded its online presence and began a program of outreach to practicing doctors of chiropractic. Advocating for patient protection, Dr. Boghosian’s initiative undertook to educate licensees about the importance of regulation and accountability for patient care.

Additionally, Dr. Boghosian’s leadership during the beginning of the Pandemic allowed FCLB to maintain communication among licensing boards and ensure patients continued to receive the care they needed.

When Dr. Boghosian ended his presidential term last year, he left behind some big shoes to fill, and a legacy to uphold.

Therefore, we are proud to present the Boghosian Visionary Award recognizing regulators, students, academics, programs, educational institutions, organizations or leaders who demonstrate a bold vision to create a better future for chiropractic patients and the profession.

This year, our inaugural honoree is  
**Dr. Jeffery Scholten of Alberta**
