Certified **Chiropractic
Clinical Assistant**

The Problems:

Lack of uniformity in training is leading to confusion about scope and duration.

Health care providers with patient contact **MUST** be properly **trained** and **accountable**.

Many **boards don't have the resources** to ensure proper CA qualifications and oversight

If boards are not establishing oversight, insurance regulators and providers may create their **own policies**.

Purpose

- Protect the public by ensuring safe, effective care
- Offer logistically feasible testing
- Promote reasonable uniformity
- Provide professional, portable, and fair certification

Program Design

Eligibility:

- At least 18 years of age
